

Hope boat: the Amazon Ark

COP30 | Amazon | 2025

A transformative boat journey from Manaus (November 4th) to Belém (November 9th), bringing together visionary leaders, Indigenous voices, and global changemakers to amplify and catalyze climate solutions

THE JOURNEY

A moving stage through the heart of the Amazon bringing together stories of hope from Amazon leaders of Indigenous communities, traditional populations, scientists, investors, philanthropists, cultural visionaries and change makers.

SANTARÉM

The background of the slide is a high-angle aerial photograph of a dirt road winding through a lush, green tropical forest. The road is a bright orange-red color, contrasting sharply with the surrounding dark green foliage.

The Amazon's COP 30:

This COP is a chance to shift the dynamic and **focus on action for nature**-based solutions with a social justice goal.

Is an historic opportunity to **bridge** grassroots **solutions** with global climate action—connecting leaders with investors to **amplify** and **ensure** **concrete impact** for the Amazon and beyond.

The Amazon is nearing an irreversible tipping point. Action cannot wait. New alliances are essential.

VISION

250 carefully selected global voices that matter in climate action.

A floating stage for radical collaboration between Amazon and global leaders. .

A convergence of science, culture, finance and activism for systemic change.

A catalyst of projects for climate mitigation and adaptation.

The background image shows an aerial perspective of a river winding its way through a vast, dense green forest. The river's edge is lined with lush vegetation, and a small white boat is visible on the water, providing a sense of scale to the large landscape.

BOAT WORKSHOPS

November 5th to 9th

A unique space for
dialogue between
forest guardians,
science, philanthropy,
investors, multilateral
organizations and civil
society organizations.

Throughout this journey, we will promote cross-cutting dialogues:

CULTURE

SCIENCE

ETHNO KNOWLEDGE

BOAT CULTURAL EVENTS

November 5th to 9th

9

SEMINARS AND EVENTS AT COP 30

November 9th-21st

The boat will become a stage in Belem for thematic events hosting up to 250 people

THE POWER OF CULTURE, STORYTELLING, SCIENCE AND FINANCE

Live global storytelling

Every moment will be broadcast to a worldwide audience.

Art as a catalyst

Music, film, and art turn urgency into emotion and action.

Voices of doers from worldwide

Climate change is a planetary issue, not a regional one.

Science based discussions

Scientific insights drive real-world impact, turning data into solutions

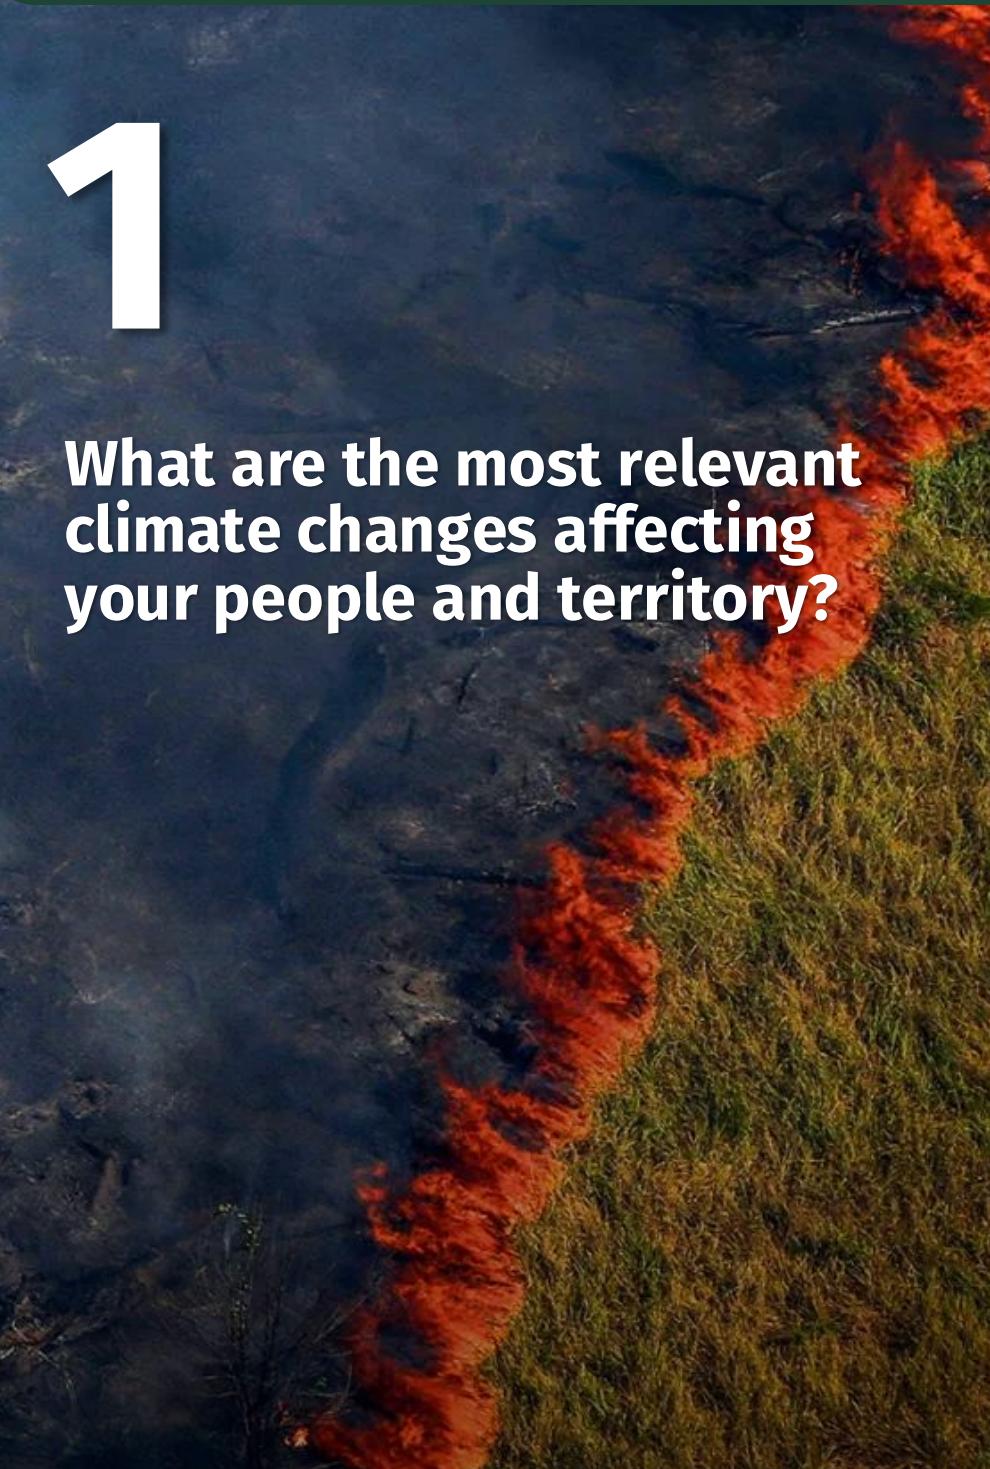

COP30 Journey

Throughout the preparatory journey, leaders from social movements and empowered youth from Amazonian communities and villages will share their challenges and solutions, addressing key questions:

1

What are the most relevant climate changes affecting your people and territory?

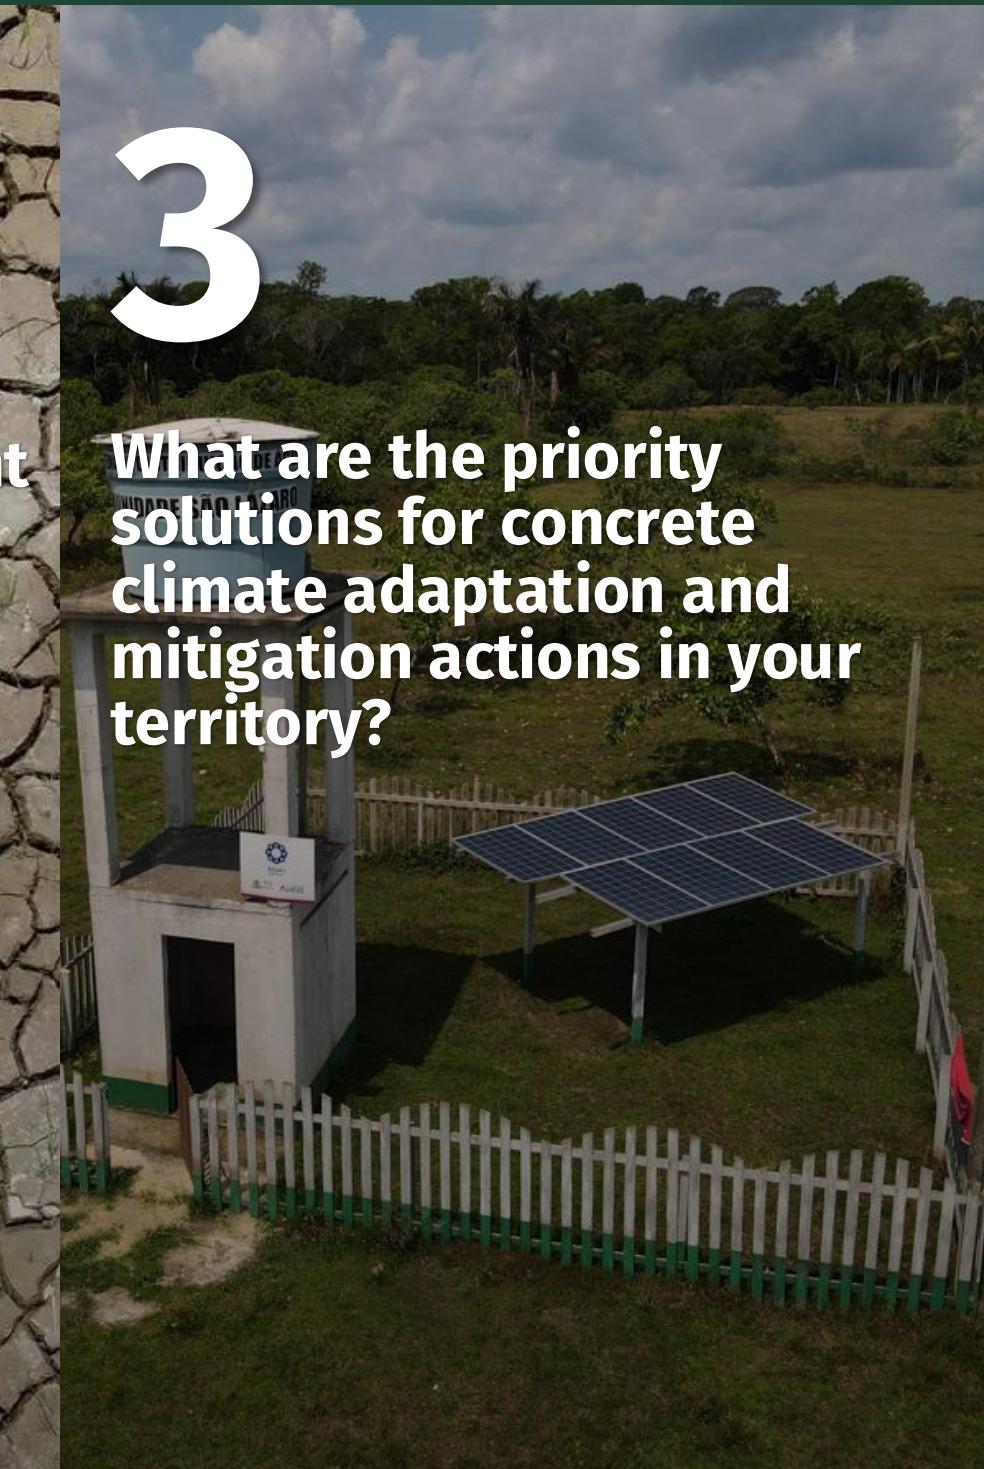

2

What are the most significant impacts on your people and local ecosystems?

3

What are the priority solutions for concrete climate adaptation and mitigation actions in your territory?

4

How do extreme weather events affect the culture and traditions in your territory?

Development of Adaptation and Mitigation Plans

Content:

- Main perceived vulnerabilities;
- Traditional knowledge and local practices for adaptation and mitigation;
- Key actors and resources identified for the implementation of the Plan;
- Budget for the proposed solution.

Presentation of the Plans to National and International Authorities during the COP

The results of the **Adaptation and Mitigation Plans** from the four segments will be presented to **Brazilian and international authorities**, incorporating the perspectives and knowledge of traditional peoples, as well as identifying the priorities of these populations for climate change adaptation in the coming years.
